

**IN THE CLAIMS:**

Please cancel claims 2-3 and 5-16, and amend claims 1 and 4 as follows:

1. (Currently Amended) A water-in-oil emulsified sunscreen cosmetic, comprising ~~components (a) through (e) as follows:~~

a) hydrophobic zinc oxide powder, manufactured through a method in which a zinc oxide powder is dispersed in a solvent, and

the surface of the zinc oxide powder is treated with a phosphate ester having a perfluoroalkyl ~~[[shown]]~~ represented by general formula (1) as follows:

(wherein Rf is a perfluoroalkyl group or a perfluorooxyalkyl group having 3-21 carbons that is a straight chain or branched and is a single chain length or a composite chain length; n is an integer from 1-12, and y is a number from 1-3), and an ester shown by general formula (2) of a copolymer of 30,000-300,000 MW of 2-ethylhexyl acrylate, methacrylate, methyl methacrylate, or butyl methacrylate and a methylpolysiloxane some of whose methyl groups have been substituted with a hydroxypropyl group, to produce the hydrophobic zinc oxide powder, said ester of a copolymer represented by general formula (2) as follows:

[Chemical formula 2]

----- (2)

(wherein n is an integer, a, b, c, and d are mole ratios within the copolymer and are not 0, and d is at least 40 mole percent but not more than 60 mole percent).

wherein the hydrophobic zinc oxide powder is manufactured using microparticle zinc oxide powder having a first-order particle diameter of 1  $\mu\text{m}$  or less, and the amount of solvent that is used is within a range of 50 to 90 wt% of the zinc oxide powder;

[Chemical formula-1]

(wherein Rf is a perfluoroalkyl group or a perfluorooxyalkyl group having 3-21 carbons that is a straight chain or branched and is a single chain length or a composite chain length; n is an integer from 1-12, and y is a number from 1-3)

[Chemical formula 2]

————— (2)

(式中、nは整数で、a、b、c、dは共重合体内のそれぞれのモル比であり、0

(wherein n is an integer, a, b, c, and d are mole ratios within the copolymer and are not 0, and d is at least 40 mole percent but not more than 60 mole percent);

(b) volatile silicone ~~Volatile Silicone~~; [[and]]

(c) 1-10 wt% caprylylmethicone, based on C6 to C12 Alkyl Trimethicone (1-10 wt% of the total weight[[I]]) of the sunscreen cosmetic, the caprylylmethicone further present in an amount of 12.5-40 wt% of the amount of volatile silicone;

(d) a lipophilic active material;

(e) water; and

(f) from 0-2 wt% of a nonvolatile non-polar oil and/or nonvolatile silicone oil,  
wherein the hydrophobic zinc oxide powder absorbs from 10-40 mL/100g of oil, and said  
sunscreen cosmetic exhibits excellent long lasting coverage and ease of washability.

2-3. (Cancelled)

4. (Currently Amended) The water-in-oil emulsified sunscreen cosmetic according to claim 1, further comprising ~~[[ (f) ]]~~ (g) an organic modified clay material.

5-16. (Cancelled)
